

## BEE KEEPING

Due to its huge variety of plant species rich in nectar, favorable climate and land configuration, bee pasture in this region lasts from mid-April till the end of August, so Jablanica bee keepers rarely move their bees to other areas.

Of all honey plants in this area, the most widespread and most abundant are: acacia, linden, chestnut, sage, heather and meadow honey plants.

Around 120 households are involved in bee keeping in Jablanica Municipality with around 1.500 bee colonies and annual honey production of around 5.000 kilograms.

Besides honey, Jablanica bee keepers also produce wax. Annual production is around 500 kilograms of melted raw wax, and other bee products.

## FISH FARMING

Production of "Neretva" brown trout spawn and consumer fish is organized in three registered fish farms, two on Grabovica lake and one on Draganjka river.

Restocking of the lakes and rivers is based on a fishing base and consent of the Federal Ministry of Agriculture, Water and Forestry. Restocking is done in a period from September to November.

Neretva River is restocked with 4.000 units of brown trout of 8 to 10 centimeters in length.

Tributaries (Doljanka, Draganjka, Ravanjka and Bijela) are restocked with 2.000 units.

## SMALL STOCK BREEDING

Jablanica has potential for small stock breeding (sheep and goats).

Today, in Jablanica, 20 families are engaged in such production with 10 of those families who have bigger farms with up to 250 heads.

- Subsidies and support to registered agricultural producers of organic food
- Co-funding of joint participation at fairs

## BUSINESS FRIENDLY ENVIRONMENT

- Proximity to the European Union and access to market with 600 million citizens
- Free trade agreements CEFTA and EFTA
- Excellent connection with Adriatic Sea (Ploče port) and the rest of Bosnia and Herzegovina
- Stimulating tax policy on state level
- Potential for granite stone exploitation and long tradition in stone processing
- Potential for development of rural, mountain, hunting and fishing, and cultural and historical tourism
- Great conditions for organic agricultural production
- Qualified workforce adaptable to the needs of the market
- Spatial planning documentation envisages establishment of 13 economic zones
- Municipality incentives adapted to the needs of private sector
- Efficient local administration

## AGRICULTURAL PRODUCTION

Agricultural production in Jablanica Municipality is based on an organic – certified way of cultivation and processing of products, and that is why Municipality supports these producers.

▪ Agricultural land covers 15,7% or approximately 45 km<sup>2</sup> of the municipality territory.;

▪ Agricultural land covers 7.863 hectares:

- 390 hectares of arable land,

- 280 hectares of orchards,

- 2.052 hectares of meadows and

- 5.141 hectares of pastures.

▪ Area of enormous potential for production of early season vegetables and other agricultural produces, especially development of greenhouse production and small stock breeding;

▪ 312 registered agricultural farms;

▪ 18 registered agricultural producers and processors with certified production or are in a process of acquiring certificate;

▪ Three registered fish farms for production of spawn and consumer fish;

▪ In last 3 years 14 hectares of raspberries, blackberries and strawberries have been planted;

On a yearly basis Municipality issues a public call for lease of agricultural land in state ownership in Jablanica.

Available possibilities for land lease:

▪ Lot sizes from 500 to 5000 m<sup>2</sup>.

▪ 20-year lease for production of perennial plantation.

▪ 10-year lease for production of vegetables, grains and herbs.

Surfaces intended for lease to legal entities and natural persons for:

▪ Up to 25 years for orchards and nursery gardens

▪ Up to 10 years for other agricultural uses -greenhouses, nursery for vegetables, nursery for ornamental-decorative plants, etc.
